PSM-220 HEAVY DUTY SERIES

DUAL PROJECTOR FLOOR/CEILING SUSPENSION SYSTEM

**NEW
IN STOCK!!**

**NEW
IN STOCK!!**

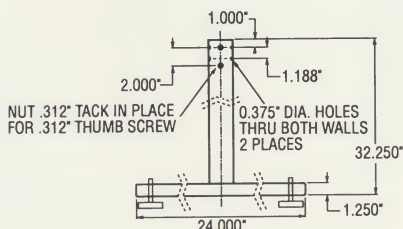

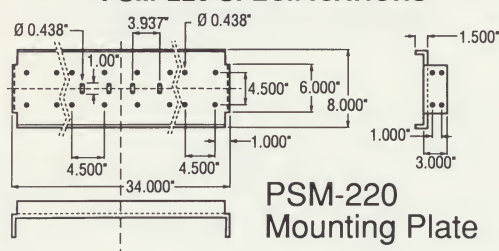

The PSM-220 was developed in answer to your request for a transportable dual video/data projector floor suspension system. The PSM-220 mates directly with any two of our PBM or PMM series projector mount kits. With an allowance of 34 inches width between the side rails the PSM-220 will easily accommodate most of the larger data projectors currently being offered. Naturally this system also incorporates all the adjustability features of height, tilt and yaw that you have come to expect from our mounts and adaptors. Quick and easy to assemble and disassemble are benefits that rental and media production companies will enjoy. With its extra heavy duty construction the PSM-220 will easily support video/data projectors from 50 to 300+ pounds. The PSM-220 suspension system can also be inverted for use as a dual projector ceiling mount.

NOTE: Initial projector to screen set-up with the PSM-220 should be established as not to exceed manufacturer's recommendation with respect to projector/screen distance and angle. Please consult your installation manual that comes with your projector to insure compliance.
